

BOARD OF GOVERNORS
OF THE
FEDERAL RESERVE SYSTEM

WASHINGTON, D.C. 20551

DIVISION OF SUPERVISION
AND REGULATION

DIVISION OF CONSUMER AND
COMMUNITY AFFAIRS

SR 19-4

CA 19-3

February 26, 2019

**TO THE OFFICER IN CHARGE OF SUPERVISION
AT EACH FEDERAL RESERVE BANK**

SUBJECT: Supervisory Rating System for Holding Companies with Total Consolidated Assets Less Than \$100 billion

Applicability: This guidance applies to bank holding companies (BHCs) and savings and loan holding companies (SLHCs).

The purpose of this letter is to clarify which rating system applies to holding companies with total consolidated assets less than \$100 billion, given the adoption of a rating system for large financial institutions (LFIs). Since 2004, the Federal Reserve has used the “RFI/C(D)” rating system (referred to as the “RFI rating system”) to communicate its supervisory assessment of BHCs regardless of their asset size, complexity, or systemic importance.¹ In 2018, the Board adopted the RFI rating system for non-insurance and non-commercial SLHCs² with total consolidated assets less than \$100 billion. At the same time, the Board also adopted a rating system for BHCs and non-insurance and non-commercial SLHCs with total consolidated assets of \$100 billion or more (referred to as the “LFI rating system”).³ As a result, the Federal Reserve has two frameworks for rating holding companies. Attachment One entitled, “Summary of the Rating Systems and General Inspection Frequency by Holding Company Type and Asset Size,” provides an overview of the Federal Reserve’s two rating systems for holding companies, as well as inspection frequency.

¹ 69 *Fed. Reg.* 70444 (December 6, 2004).

² SLHCs that are excluded from the definition of “covered holding company” in section 217.2 of the Board’s Regulation Q receive indicative supervisory ratings. Section 271.2 excludes the following SLHCs: (1) SLHCs that derive 50 percent or more of their total consolidated assets or total revenues from activities that are not financial in nature under section 4(k) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1843(k)) (commercial SLHCs), and (2) SLHCs that are insurance companies or hold 25 percent or more of their total consolidated assets in subsidiaries that are insurance companies (insurance SLHCs).

³ See 83 *Fed. Reg.* 58724 (November 21, 2018); 84 *Fed. Reg.* 4309 (February 15, 2019); and SR letter 19-3/CA letter 19-2, “Large Financial Institution Rating System.”

Overview of the RFI Rating System

The main components of the RFI rating system are risk management practices (R component) and financial condition (F component) of the consolidated organization, and an assessment of the potential impact (I component) of a holding company's nondepository entities on its subsidiary depository institution(s). A holding company under the RFI rating system is assigned a composite rating (C) based on an evaluation and rating of its managerial and financial condition and an assessment of future potential risk to its subsidiary depository institution(s). A holding company under the RFI rating system is also assigned a depository institution (D) component rating that generally mirrors the primary regulator's assessment of the subsidiary depository institution(s). A description of the complete RFI rating system is provided in Attachment Two entitled, "RFI Rating System."⁴

Rating Holding Companies with Total Consolidated Assets Between \$10 Billion and \$100 Billion

The RFI rating system generally applies to BHCs and non-insurance and non-commercial SLHCs with total consolidated assets less than \$100 billion. Examination staff assign and communicate ratings to BHCs and non-insurance and non-commercial SLHCs with total consolidated assets between \$10 billion and \$100 billion on at least an annual basis, and more frequently as warranted. However, U.S. intermediate holding companies (IHCs) of foreign banking organizations (FBOs) established under the Board's Regulation YY that have total consolidated assets of \$50 billion or more would be subject to the LFI rating system.⁵

Holding Companies with Total Consolidated Assets of \$10 Billion or Less

BHCs and SLHCs with total consolidated assets of \$10 billion or less are subject to the RFI rating system. However, for noncomplex holding companies with total consolidated assets less than \$3 billion, the Reserve Bank assigns only a composite rating and risk management rating to the holding company based on the ratings of the lead depository institution. The scope and frequency of inspections of a holding company with total consolidated assets of \$10 billion or less is dependent on a number of factors such as the asset size, rating and examination cycle of the holding company's subsidiary depository institution, and the complexity of the holding company. For more information, see SR letter 13-21, "Inspection Frequency and Scope Requirements for Bank Holding Companies and Savings and Loan Holding Companies with Total Consolidated Assets of \$10 Billion or Less."

⁴ The 2004 "RFI Rating System" document has been revised to clarify the applicability of the rating system and to provide current references to regulations and guidance. The elements of the RFI rating system and the ratings' definitions are unchanged. With the issuance of this letter, SR letter 04-18, "Bank Holding Company Rating System," is superseded.

⁵ 12 CFR 252.153. Consistent with the Board's proposal on tailoring its supervisory expectations for domestic institutions (See 83 *Fed. Reg.* 61408 (November 29, 2018)), the Board continues to consider tailoring for FBOs. As such, the Board may adjust the asset threshold for application of the LFI rating system to IHCs in the future.

Rating Savings and Loan Holding Companies

The Dodd-Frank Wall Street Reform and Consumer Protection Act transferred to the Federal Reserve the supervisory functions of the Office of Thrift Supervision related to SLHCs and their nondepository subsidiaries beginning on July 21, 2011.⁶ At that time, the Federal Reserve decided to issue “indicative RFI ratings” to SLHCs until such time that a rating system was formally adopted for these companies.⁷

In November 2018, the Federal Reserve adopted a final rule to apply the RFI rating system on a fully implemented basis to SLHCs with total consolidated assets less than \$100 billion, excluding SLHCs engaged in significant insurance or commercial activities.⁸ Starting on February 1, 2019, the Federal Reserve will assign an RFI rating to non-insurance and non-commercial SLHCs with total consolidated assets less than \$100 billion. Non-insurance and non-commercial SLHCs face similar risks and engage largely in the same activities as BHCs. The Federal Reserve is fully applying RFI rating system to non-insurance and non-commercial SLHCs to ensure that they are subject to standards and supervisory programs that are consistent with those that apply to BHCs. Non-insurance and non-commercial SLHCs with total consolidated assets of \$10 billion or less should also refer to SR letter 13-21 for the inspection frequency and the assignment of the RFI rating. Further, in November 2018, the Federal Reserve adopted the LFI rating system for non-insurance or non-commercial SLHCs with total consolidated assets of \$100 billion or more.

The Federal Reserve will continue to assign an indicative RFI rating to SLHCs engaged in significant insurance or commercial activities, regardless of asset size. The Federal Reserve is in the process of reviewing whether a modified version of the RFI rating system, LFI rating system, or some other supervisory rating system is appropriate for these firms on a permanent basis.

Rating Holding Companies with Total Consolidated Assets of \$100 Billion or More

The LFI rating system assigns component ratings for (1) capital planning and positions, (2) liquidity risk management and positions, and (3) governance and controls. The Federal Reserve will not assign a standalone composite rating under the LFI rating system because the three component ratings are designed to clearly communicate supervisory assessments and associated consequences for each of the core areas (capital, liquidity, and governance and controls). A description of the complete LFI rating system is also provided in SR letter 18-11/CA letter 18-10, “Large Financial Institution Ratings.”

⁶ 12 U.S.C. 5412(b)(1)

⁷ “Indicative ratings” were issued to SLHCs as a way of providing feedback to SLHCs regarding supervisory expectations. “Indicative ratings” described how the SLHC would be rated under the RFI rating system if applied to the company.

⁸ See 83 *Fed. Reg.* 56081 (November 7, 2018). With the issuance of this final guidance in the *Federal Register*, SR letter 13-8 / CA letter 13-5, “Extension of the Use of Indicative Ratings for Savings and Loan Holding Companies” and SR letter 11-11, “Supervision of Savings and Loan Holding Companies (SLHCs),” are superseded.

The LFI rating system applies to BHCs, non-insurance and non-commercial SLHCs with total consolidated assets of \$100 billion or more, and to U.S. IHCs of foreign banking organizations established under Regulation YY with total consolidated assets of \$50 billion or more.⁹ Consistent with the Federal Reserve’s longstanding practice for these firms, examiners will assign these institutions component ratings and communicate the ratings to a firm on at least an annual basis, and more frequently as warranted. After the initial LFI rating supervisory cycle, examiners may assign and communicate individual component ratings to a firm on a rolling basis, but at least annually.

Contact Information

Reserve Banks are asked to distribute this letter to supervised institutions in their districts, as well as to appropriate supervisory and examination staff. Questions regarding this letter should be directed to the following Board staff:

- Division of Supervision and Regulation: Kevin Bertsch, Associate Director, (202) 452-5265, Anthony Cain, Manager-Regional Bank Supervision, (202) 912-4377, Angela Knight-Davis, Manager-Specialty SLHCs, (202) 475-6679 or Jonathan Rono, Manager Community Bank Supervision (202) 721-4568.
- Division of Consumer and Community Affairs: Phyllis Harwell, Associate Director, (202) 452-3658 or Mayank Patel, Manager, (202) 452-2316.

In addition, questions may be sent via the Board’s public website.¹⁰

**Summary of the Rating Systems and General Inspection Frequency
By Holding Company Type and Asset Size**

February 2019

Rating Systems for Holding Companies

Type of Holding Company	Total Consolidated Asset Size				
	\$100 Billion or More	Between \$100 Billion and \$10 Billion	Between \$10 Billion and \$3 Billion	Less than \$3 Billion (complex)	Less than \$3 Billion (noncomplex)
Bank holding company	LFI Rating	RFI Rating			Modified RFI Rating ¹
Non-insurance and non-commercial savings and loan holding company	LFI Rating	RFI Rating			Modified RFI Rating
Insurance savings and loan holding company ²	Indicative RFI Rating				
Commercial savings and loan holding company ³	Indicative RFI Rating				
Intermediate holding company ⁴	LFI Rating	Not applicable			

Footnotes:

1. The Modified RFI Rating includes a composite rating and risk management rating to the holding company. See [SR letter 13-21](#), "Inspection Frequency and Scope Requirements for Bank Holding Companies and Savings and Loan Holding Companies with Total Consolidated Assets of \$10 Billion or Less."
2. Savings and loan holding companies (SLHCs) are considered to be "insurance savings and loan holding companies" if they are either insurance companies or hold 25% or more of their total consolidated assets in subsidiaries that are insurance companies.
3. SLHCs are considered to be "commercial savings and loan holding companies" if they derive 50% or more of their total consolidated assets or total revenues from activities that are not financial in nature under section 4(k) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1843(k)).
4. U.S. intermediate holding companies of foreign banking organizations (FBOs) established under the Board's Regulation YY that have \$50 billion or more in total consolidated assets would be subject to the LFI rating system.

General Inspection Frequency for a Holding Company

Type of Holding Company	Total Consolidated Asset Size				
	\$100 Billion or More	Between \$100 Billion and \$10 Billion	Between \$10 Billion and \$3 Billion	Less than \$3 Billion (complex)	Less than \$3 Billion (noncomplex)
Bank holding company ¹	Ratings (or indicative ratings) assigned and communicated to firms on at least an annual basis, and more frequently as warranted.		See SR letter 13-21 , “Inspection Frequency and Scope Requirements for Bank Holding Companies and Savings and Loan Holding Companies with Total Consolidated Assets of \$10 Billion or Less,” and its attachment for more information in inspection frequency and scope.

**RFI Rating System
(February 2019)¹**

The RFI/C(D) rating system (referred to as the RFI rating system) provides an assessment of certain risk management and financial condition factors that are common to holding companies,² as well as an assessment of the potential impact of the parent holding company and its nondepository subsidiaries (collectively, nondepository entities) on the holding company's subsidiary depository institutions. Under this system, the Federal Reserve endeavors to ensure that applicable bank holding companies (BHCs), including financial holding companies (FHCs), and non-insurance and non-commercial savings and loan holding companies (SLHCs) are evaluated in a comprehensive and uniform manner, and that supervisory attention is appropriately focused on the holding companies that exhibit financial and operational weaknesses or adverse trends. The RFI rating system serves as a useful vehicle for identifying problem or deteriorating holding companies, as well as for categorizing holding companies with deficiencies in particular areas. Further, the RFI rating system assists the Federal Reserve in following safety and soundness trends and in assessing the aggregate strength and soundness of the financial industry.

Each holding company³ subject to the RFI rating system is assigned a composite rating (C) based on an overall evaluation and rating of its managerial and financial condition and an assessment of future potential risk to its subsidiary depository institution(s). The main components of the rating system represent: Risk Management⁴ (R); Financial Condition (F); and Impact (I) of the nondepository entities on the subsidiary depository institutions. While the Federal Reserve expects holding companies to act as a source of strength to their subsidiary depository institutions, the Impact rating focuses on downside risk--that is, on the likelihood of significant negative impact by the nondepository entities on the subsidiary depository institution(s). A fourth rating, Depository Institution(s) (D), will generally mirror the primary

¹ With the adoption of the LFI rating system for holding companies with total consolidated assets of \$100 billion or more and the RFI rating system for non-insurance and non-commercial savings and loan holding companies with less than \$100 billion in total consolidated assets, the 2004 RFI rating system document has been revised to clarify the applicability of the rating system and to provide current references to regulations and guidance. The elements of the RFI rating system and the ratings' definitions are unchanged.

² The RFI rating system applies to bank holding companies and non-insurance and non-commercial savings and loan holding companies with less than \$100 billion in total consolidated assets. However, U.S. intermediate holding companies of foreign banking organizations established under the Board's Regulation YY that have \$50 billion or more in total consolidated assets would not be subject to the RFI rating system. See 83 *Fed. Reg.* 58724 (November 21, 2018) and 84 *Fed. Reg.* 4309 (February 15, 2019) for more information.

³ A simplified version of the rating system that includes only the R and C components will be applied to noncomplex holding companies with assets at or below \$3 billion. See SR letter 13-21, "Inspection Frequency and Scope Requirements for Bank Holding Companies and Savings and Loan Holding Companies with Total Consolidated Assets of \$10 Billion or Less," for more information.

⁴ In 2004, this risk management rating replaced the risk management rating required for bank holding companies by SR letter 95-51. "Rating the Adequacy of Risk Management Processes and Internal Controls at State Member Banks and Bank Holding Companies."

regulator's assessment of the subsidiary depository institution(s). Thus, the primary component and composite ratings are displayed:

R F I / C (D)

In order to provide a consistent framework for assessing risk management, the R component is supported by four subcomponents that reflect the effectiveness of the organization's risk management and controls. The subcomponents are: Board and Senior Management Oversight; Policies, Procedures, and Limits; Risk Monitoring and Management Information Systems; and Internal Controls. The F component is also supported by four subcomponents reflecting an assessment of the quality of the consolidated organization's Capital; Asset Quality; Earnings; and Liquidity.

Composite, component, and subcomponent ratings are assigned based on a 1 to 5 numeric scale. A 1 numeric rating indicates the highest rating, strongest performance and practices, and least degree of supervisory concern, whereas a 5 numeric rating indicates the lowest rating, weakest performance, and the highest degree of supervisory concern.

The following three sections contain detailed descriptions of the composite, component, and subcomponent ratings, implementation guidance by holding company type, and definitions of the ratings.

I. Description of the RFI Rating System Elements

The Composite (C) Rating

C is the overall composite assessment of the holding company as reflected by consolidated risk management, consolidated financial strength, and the potential impact of the nondepository entities on the subsidiary depository institutions. The composite rating encompasses both a forward-looking and static assessment of the consolidated organization, as well as an assessment of the relationship between the depository and nondepository entities. The C rating is not derived as a simple numeric average of the R, F, and I components; rather, it reflects examiner judgment with respect to the relative importance of each component to the safe-and-sound operation of the holding company.

The Risk Management (R) Component

R represents an evaluation of the ability of the holding company's board of directors and senior management, as appropriate for their respective positions, to identify, measure, monitor, and control risk. The R rating underscores the importance of the control environment, taking into consideration the complexity of the organization and the risk inherent in its activities.

The R rating is supported by four subcomponents that are each assigned a separate rating. The four subcomponents are as follows: 1) Board and Senior Management Oversight; 2) Policies, Procedures and Limits; 3) Risk Monitoring and Management Information Systems; and 4) Internal Controls. The subcomponents are evaluated in the context of the risks undertaken by and inherent in an organization and the overall level of complexity of the holding company's operations. They provide the Federal Reserve with a consistent framework for evaluating risk

management and the control environment. Moreover, the subcomponents provide a clear structure and basis for discussion of the R rating with holding company management, reflect the principles in supervisory guidance⁵ that are familiar to examiners, and parallel the existing risk assessment process.

Risk Management Subcomponents⁶

Board and Senior Management Oversight⁷

This subcomponent evaluates the adequacy and effectiveness of board and senior management's understanding and management of risk inherent in the holding company's activities, as well as the general capabilities of management. It also includes consideration of management's ability to identify, understand, and control the risks undertaken by the institution, to hire competent staff, and to respond to changes in the institution's risk profile or innovations in the banking sector.

Policies, Procedures and Limits

This subcomponent evaluates the adequacy of a holding company's policies, procedures, and limits given the risks inherent in the activities of the consolidated organization and its stated goals and objectives. This analysis will include consideration of the adequacy of the institution's accounting and risk disclosure policies and procedures.

Risk Monitoring and Management Information Systems

This subcomponent assesses the adequacy of a holding company's risk measurement and monitoring, and the adequacy of its management reports and information systems. This analysis will include a review of the assumptions, data, and procedures used to measure risk and the consistency of these tools with the level of complexity of the organization's activities.

Internal Controls

This subcomponent evaluates the adequacy of a holding company's internal controls and internal audit procedures, including the accuracy of financial reporting and disclosure and the strength and influence, within the organization, of the internal audit team. This analysis will also include a review of the independence of control areas from management and the consistency of the scope coverage of the internal audit team with the complexity of the organization.

The Financial Condition (F) Component

F represents an evaluation of the consolidated organization's financial strength. The F rating focuses on the ability of the holding company's resources to support the level of risk

⁵ See SR letter 95-51, "Rating the Adequacy of Risk Management Processes and Internal Controls at State Member Banks and Bank Holding Companies," and SR letter 16-11, "Supervisory Guidance for Assessing Risk Management at Supervised Institutions with Total Consolidated Assets Less than \$50 Billion."

⁶ SR letters 95-51 and 16-11 contain a detailed description of the four risk management subcomponents.

⁷ The board of directors is considered separate from management.

associated with its activities. The F rating is supported by four subcomponents: capital (C), asset quality (A), earnings (E), and liquidity (L). The CAEL subcomponents can be evaluated along individual business lines, product lines, or on a legal entity basis, depending on what is most appropriate given the structure of the organization. The assessment of the CAEL components should utilize benchmarks and metrics appropriate to the business activity being evaluated.

Examination staff should continue to review relevant market indicators, such as external debt ratings, credit spreads, debt and equity prices, and qualitative rating agency assessments as a source of information complementary to examination findings.

Financial Condition Subcomponents (CAEL)

Capital Adequacy

C reflects the adequacy of an organization's consolidated capital position, from a regulatory capital perspective and an economic capital perspective, as appropriate to the holding company.⁸ The evaluation of capital adequacy should consider the risk inherent in an organization's activities and the ability of capital to absorb unanticipated losses, to provide a base for growth, and to support the level and composition of the parent company and subsidiaries' debt.

Asset Quality

A reflects the quality of an organization's consolidated assets. The evaluation should include, as appropriate, both on-balance sheet and off-balance sheet exposures, and the level of criticized and nonperforming assets. Forward-looking indicators of asset quality, such as the adequacy of underwriting standards, the level of concentration risk, the adequacy of credit administration policies and procedures, and the adequacy of management information systems for credit risk may also inform the Federal Reserve's view of asset quality.

Earnings

E reflects the quality of consolidated earnings. The evaluation considers the level, trend, and sources of earnings, as well as the ability of earnings to augment capital as necessary, to provide ongoing support for a holding company's activities.

Liquidity

L reflects the consolidated organization's ability to attract and maintain the sources of funds necessary to support its operations and meet its obligations. The funding conditions for each of the material legal entities in the holding company structure should be evaluated to determine if any weaknesses exist that could affect the funding profile of the consolidated organization.

⁸ The regulatory minimum capital ratios for covered holding companies subject to the Board's Regulation Q (12 CFR 217) are (1) a common equity tier 1 capital ratio of 4.5 percent; (2) a tier 1 capital ratio of 6 percent; (3) a total capital ratio of 8 percent; (4) a leverage ratio of 4 percent, and (5) for advanced approaches Board-regulated institutions, a supplementary leverage ratio of 3 percent. .

The Impact (I) Component

Like the other components and subcomponents, the I component is rated on a five point numerical scale. However, the descriptive definitions of the numerical ratings for I are different than those of the other components and subcomponents. The I ratings are defined as follows:

- 1 – low likelihood of significant negative impact;
- 2 – limited likelihood of significant negative impact;
- 3 – moderate likelihood of significant negative impact;
- 4 – considerable likelihood of significant negative impact; and
- 5 – high likelihood of significant negative impact.

The I component is an assessment of the potential impact of the nondepository entities on the subsidiary depository institution(s). The I assessment will evaluate both the risk management practices and financial condition of the nondepository entities--an analysis that will borrow heavily from the analysis conducted for the R and F components. Nondepository entities will be evaluated using benchmarks and analysis appropriate for those businesses. In addition, for functionally regulated nondepository subsidiaries, examination staff will continue to rely, to the extent possible, on the work of those functional regulators to assess the risk management practices and financial condition of those entities. In rating the I component, examination staff is required to evaluate the degree to which current or potential issues within the nondepository entities present a threat to the safety and soundness of the subsidiary depository institution(s).

The I component focuses on the aggregate impact of the nondepository entities on the subsidiary depository institution(s). In this regard, the I rating does not include individual subcomponent ratings for the parent company and nondepository subsidiaries. An I rating is always assigned for each holding company; however, nonmaterial nondepository subsidiaries⁹ may be excluded from the I analysis at examiner discretion.

Any risk management and financial issues at the nondepository entities that potentially impact the safety and soundness of the subsidiary depository institution(s) should be identified in the written comments under the I rating. This approach is consistent with the Federal Reserve's objective not to extend bank-like supervision to nondepository entities.

The analysis of the parent company for the purpose of assigning an I rating should emphasize weaknesses that could directly impact the risk management or financial condition of the subsidiary depository institution(s). Similarly, the analysis of the nondepository subsidiaries for the purpose of assigning an I rating should emphasize weaknesses that could negatively impact the parent company's relationship with its subsidiary depository institution(s) and weaknesses that could have a direct impact on the risk management practices or financial condition of the subsidiary depository institution(s). The analysis under the I component should

⁹ In general, nondepository subsidiaries should be included in the I analysis whenever their assets exceed five percent of the holding company's consolidated capital or \$10 million, whichever is lower.

consider existing as well as potential issues and risks that may impact the subsidiary depository institution(s) now or in the future. Particular attention should be paid to the following risk management and financial factors in assigning the I rating:

Risk Management Factors

- *Strategic Considerations:* The potential risks posed to the subsidiary depository institution(s) by the nondepository entities' strategic plans for growth in existing activities and expansion into new products and services;
- *Operational Considerations:* The spillover impact on the subsidiary depository institution(s) from actual losses, a poor control environment, or an operational loss history in the nondepository entities;
- *Legal and Reputational Considerations:* The spillover effect on the subsidiary depository institution(s) of complaints and litigation that name one or more of the nondepository entities as defendants, or violations of laws or regulations, especially pertaining to intercompany transactions where the subsidiary depository institution(s) is involved; and
- *Concentration Considerations:* The potential risks posed to the subsidiary depository institution(s) by concentrations within the nondepository entities in business lines, geographic areas, industries, customers, or other factors.

Financial Factors

- *Capital Distribution:* The distribution and transferability of capital across the legal entities;
- *Intra-Group Exposures:* The extent to which intra-group exposures, including servicing agreements, have the potential to undermine the condition of subsidiary depository institution(s); and
- *Parent Company Cash Flow and Leverage:* The extent to which the parent company is dependent on dividend payments, from both the nondepository subsidiaries and the subsidiary depository institution(s), to service debt and cover fixed charges. Also, the effect that these upstreamed cash flows have had, or can be expected to have, on the financial condition of the holding company's nondepository subsidiaries and subsidiary depository institution(s).

The Depository Institution(s) (D) Component

The (D) component will generally reflect the composite CAMELS rating assigned by the subsidiary depository institution's primary supervisor. In a multi-depository institution holding company, the (D) rating will reflect a weighted average of the CAMELS composite ratings of the individual subsidiary depository institutions, weighted by both asset size and the relative importance of each depository institution within the holding company structure. In this regard, the CAMELS composite rating for a subsidiary depository institution that dominates the corporate culture may figure more prominently in the assignment of the (D) rating than would be dictated by asset size, particularly when problems exist within that depository institution.

The (D) component conveys important supervisory information, reflecting the primary supervisor’s assessment of the legal entity. The (D) component stands outside of the composite rating although significant risk management and financial condition considerations at the depository institution level are incorporated in the consolidated R and F ratings, which are then factored into the C rating.

In the process of analyzing the financial condition and risk management programs of the consolidated organization, a major difference of opinion regarding the safety and soundness of the subsidiary depository institution(s) emerges between the Federal Reserve and the depository institution’s primary regulator, then the (D) rating should reflect the Federal Reserve’s evaluation.

To highlight the presence of one or more problem depository institution(s) in a multi-depository institution holding company whose depository institution component, based on weighted averages, might not otherwise reveal their presence (i.e., depository institution ratings of 1, 2 or 3), a problem modifier, “P” would be attached to the depository institution rating (e.g., 1P, 2P, or 3P). Thus, 2P would indicate that, while on balance the depository subsidiaries are rated satisfactory, there exists a problem depository institution (composite 4 or 5) among the subsidiary depository institutions. The problem identifier is unnecessary when the depository institution component is rated 4 or 5.

II. Implementation of the RFI Rating System by Holding Company Type

Since 2004, the Federal Reserve has used the RFI rating system to communicate its supervisory assessment of BHCs regardless of their asset size, complexity, or systemic importance. In 2018, the Board adopted the RFI rating system for non-insurance and non-commercial SLHCs with less than \$100 billion in total consolidated assets. The scope and frequency of inspections of holding companies under the RFI rating system will vary based upon whether a holding company has been determined to be “complex” or “noncomplex.”¹⁰ In addition, the resources dedicated to the inspection of each holding company will continue to be determined by the risk posed by the subsidiary depository institution(s) to the federal safety net¹¹ and the risk posed by the holding company to the subsidiary depository institution(s).

Noncomplex Holding Companies with Assets of \$3 Billion or Less (Shell Holding Companies) Rating: R and C

¹⁰ The determination of whether a holding company is “complex” versus “noncomplex” is made at least annually on a case-by-case basis taking into account and weighing a number of considerations, such as: the size and structure of the holding company; the extent of intercompany transactions between depository institution subsidiaries and the holding company or nondepository subsidiaries of the holding company; the nature and scale of any nondepository activities, including whether the activities are subject to review by another regulator and the extent to which the holding company is conducting Gramm-Leach-Bliley authorized activities (e.g., insurance, securities, merchant banking); whether risk management processes for the holding company are consolidated; and whether the holding company has material debt outstanding to the public. Size is a less important determinant of complexity than many of the factors noted above.

¹¹ The federal safety net includes the federal deposit insurance fund, the payments system, and the Federal Reserve’s discount window.

Examination staff will assign only an R and C rating for all noncomplex holding companies with assets under \$3 billion.¹² The R rating is the M rating from the subsidiary depository institution's CAMELS rating. The C rating is the subsidiary depository institution's composite CAMELS rating.

Noncomplex Holding Companies with Assets Greater than \$3 Billion

One-Depository Institution Holding Company Rating: RFI/C (D)

For all noncomplex, one-depository institution holding companies with assets of greater than \$3 billion, examination staff will assign all component and subcomponent ratings; however, examination staff should rely heavily on information and analysis contained in the primary regulator's report of examination for the subsidiary depository institution to assign the R and F ratings. If examination staff have reviewed the primary regulator's examination report and are comfortable with the analysis and conclusions contained in that report, then the holding company ratings should be supported with concise language that indicates that the conclusions are based on the analysis of the primary regulator. No additional analysis will be required.

Please note, however, in cases where the analysis and conclusions of the primary regulator are insufficient to assign the ratings, the primary regulator should be contacted to ascertain whether additional analysis and support may be available. Further, if discussions with the primary regulator do not provide sufficient information to assign the ratings, discussions with holding company management may be warranted to obtain adequate information to assign the ratings. In most cases, additional information or support obtained through these steps will be sufficient to permit the assignment of the R and F ratings. To the extent that additional analysis is deemed necessary, the level of analysis and resources spent on this assessment should be in line with the level of risk the subsidiary depository institution poses to the federal safety net. In addition, any activities that involve information gathering with respect to the subsidiary depository institution should be coordinated with and, if possible, conducted by, the primary regulator of that institution.

Examination staff are required to make an independent assessment in order to assign the I rating, which provides an evaluation of the impact of the holding company on the subsidiary depository institution. Analysis for the I rating in non-complex one-depository institution holding companies should place particular emphasis on issues related to parent company cash flow and compliance with sections 23A and 23B of the Federal Reserve Act.

Multi-Depository Institution Holding Company Rating: RFI/C (D)

For all noncomplex holding companies with assets of greater than \$3 billion and more than one subsidiary depository institution, examination staff will assign all component and subcomponent ratings of the RFI rating system. Examiners should rely, to the extent possible, on the work conducted by the primary regulators of the subsidiary depository institutions to assign the R and F ratings. However, any risk management or other important functions conducted by

¹² Refer to SR letter 13-21, "Inspection Frequency and Scope Requirements for Bank Holding Companies and Savings and Loan Holding Companies with Total Consolidated Assets of \$10 Billion or Less."

the nondepository entities of the holding company, or conducted across legal entity lines, should be subject to review by Federal Reserve examination staff. These reviews should be conducted in coordination with the primary regulator(s). The assessment for the I rating requires an independent assessment by Federal Reserve examination staff.

Complex Holding Companies Rating: RFI/C (D)

For complex holding companies, examination staff will assign all component and subcomponent ratings of the RFI rating system. The ratings analysis should be based on the primary and functional regulators' assessment of the subsidiary entities, as well as on the examiners' assessment of the consolidated organization as determined through off-site review and the holding company inspection process, as appropriate. The resources needed for the inspection and the level of support needed for developing a full rating will depend on the complexity of the organization, including structure and activities, and should be commensurate with the level of risk posed by the subsidiary depository institution(s) to the federal safety net and the level of risk posed by the holding company to the subsidiary depository institution(s).

Nontraditional Holding Companies Rating: RFI/C (D)

Examination staff are required to assign the full rating system for nontraditional holding companies. Nontraditional holding companies include holding companies in which most or all nondepository entities are regulated by a functional regulator and in which the subsidiary depository institution(s) are small in relation to the nondepository entities¹³. The rating system is not intended to introduce significant additional work in the rating process for these organizations. As discussed above, the level of analysis conducted and resources needed to inspect the holding company and to assign the consolidated R and F ratings should be commensurate with the level of risk posed by the subsidiary depository institution(s) to the federal safety net and the level of risk posed by the holding company to the subsidiary depository institution(s). The report of examination by, and other information obtained from, the functional and primary bank regulators should provide the basis for the consolidated R and F ratings. On-site work, to the extent it involves areas that are the primary responsibility of the functional or primary depository institution(s) regulator, should be coordinated with and, if possible, conducted by, those regulators. Examination staff should concentrate their independent analysis for the R and F ratings around activities and risk management conducted by the parent company and non-functionally regulated nondepository subsidiaries, as well as around activities and risk management functions that are related to the subsidiary depository institution(s), for example, audit functions for the depository institution(s) and compliance with sections 23A and 23B.

Examination staff are required to make an independent assessment of the impact of the nondepository entities on the subsidiary depository institution(s) in order to assign the I rating.

¹³ SLHCs that derive 50 percent or more of their total consolidated assets or total revenues from activities that are not financial in nature under section 4(k) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1843(k)) (commercial SLHCs), and SLHCs that are insurance companies or hold 25 percent or more of their total consolidated assets in subsidiaries that are insurance companies (insurance SLHCs) will receive an "indicative" RFI rating regardless of size.

III. Rating Definitions for the RFI/C (D) Rating System

All component and subcomponent ratings are rated on a five point numeric scale. With the exception of the I component, ratings will be assigned in ascending order of supervisory concern as follows:

1 – Strong; 2 – Satisfactory; 3 – Fair; 4 – Marginal; and 5 – Unsatisfactory.

A description of the I component ratings is in the I section below.

The component ratings are not derived as a simple numeric average of the subcomponent ratings; rather, weight afforded to each subcomponent in the overall component rating will depend on the severity of the condition of that subcomponent and the relative importance of that subcomponent to the consolidated organization. Similarly, some components may be given more weight than others in determining the composite rating, depending on the situation of the holding company. Assignment of a composite rating may incorporate any factor that bears significantly on the overall condition and soundness of the holding company, although generally the composite rating bears a close relationship to the component ratings assigned.

Composite Rating

Rating 1 (Strong). Holding companies in this group are sound in almost every respect; any negative findings are basically of a minor nature and can be handled in a routine manner. Risk management practices and financial condition provide resistance to external economic and financial disturbances. Cash flow is more than adequate to service debt and other fixed obligations, and the nondepository entities pose little risk to the subsidiary depository institution(s).

Rating 2 (Satisfactory). Holding companies in this group are fundamentally sound but may have modest weaknesses in risk management practices or financial condition. The weaknesses could develop into conditions of greater concern but are believed correctable in the normal course of business. As such, the supervisory response is limited. Cash flow is adequate to service obligations, and the nondepository entities are unlikely to have a significant negative impact on the subsidiary depository institution(s).

Rating 3 (Fair). Holding companies in this group exhibit a combination of weaknesses in risk management practices and financial condition that range from fair to moderately severe. These companies are less resistant to the onset of adverse business conditions and would likely deteriorate if concerted action is not effective in correcting the areas of weakness. Consequently, these companies are vulnerable and require more than normal supervisory attention and financial surveillance. However, the risk management and financial capacity of the company, including the potential negative impact of the nondepository entities on the subsidiary depository institution(s), pose only a remote threat to its continued viability.

Rating 4 (Marginal). Holding companies in this group have an immoderate volume of risk management and financial weaknesses, which may pose a heightened risk of significant negative impact on the subsidiary depository institution(s). The holding company's cash flow needs may

be being met only by upstreaming imprudent dividends and/or fees from its subsidiaries. Unless prompt action is taken to correct these conditions, the organization's future viability could be impaired. These companies require close supervisory attention and substantially increased financial surveillance.

Rating 5 (Unsatisfactory). The critical volume and character of the risk management and financial weaknesses of holding companies in this category, and concerns about the nondepository entities negatively impacting the subsidiary depository institution(s), could lead to insolvency without urgent aid from shareholders or other sources. The imminent inability to prevent liquidity and/or capital depletion places the holding company's continued viability in serious doubt. These companies require immediate corrective action and constant supervisory attention.

Risk Management Component

Rating 1 (Strong). A rating of 1 indicates that management effectively identifies and controls all major types of risk posed by the holding company's activities. Management is fully prepared to address risks emanating from new products and changing market conditions. The board and management are forward-looking and active participants in managing risk. Management ensures that appropriate policies and limits exist and are understood, reviewed, and approved by the board. Policies and limits are supported by risk monitoring procedures, reports, and management information systems that provide management and the board with the information and analysis that is necessary to make timely and appropriate decisions in response to changing conditions. Risk management practices and the organization's infrastructure are flexible and highly responsive to changing industry practices and current regulatory guidance. Staff has sufficient experience, expertise and depth to manage the risks assumed by the institution.

Internal controls and audit procedures are sufficiently comprehensive and appropriate to the size and activities of the institution. There are few noted exceptions to the institution's established policies and procedures, and none are material. Management effectively and accurately monitors the condition of the institution consistent with the standards of safety and soundness, and in accordance with internal and supervisory policies and practices. Risk management processes are fully effective in identifying, monitoring, and controlling the risks to the institution.

Rating 2 (Satisfactory). A rating of 2 indicates that the institution's management of risk is largely effective, but lacking in some modest degree. Management demonstrates a responsiveness and ability to cope successfully with existing and foreseeable risks that may arise in carrying out the institution's business plan. While the institution may have some minor risk management weaknesses, these problems have been recognized and are in the process of being resolved. Overall, board and senior management oversight, policies and limits, risk monitoring procedures, reports, and management information systems are considered satisfactory and effective in maintaining a safe and sound institution. Risks are controlled in a manner that does not require more than normal supervisory attention.

The holding company's risk management practices and infrastructure are satisfactory and generally are adjusted appropriately in response to changing industry practices and current regulatory guidance. Staff experience, expertise and depth are generally appropriate to manage the risks assumed by the institution.

Internal controls may display modest weaknesses or deficiencies, but they are correctable in the normal course of business. The examiner may have recommendations for improvement, but the weaknesses noted should not have a significant effect on the safety and soundness of the institution.

Rating 3 (Fair). A rating of 3 signifies that risk management practices are lacking in some important ways and, therefore, are a cause for more than normal supervisory attention. One or more of the four elements of sound risk management¹⁴ (active board and senior management oversight; adequate policies, procedures, and limits; adequate risk management monitoring and management information systems; comprehensive internal controls) is considered less than acceptable, and has precluded the institution from fully addressing one or more significant risks to its operations. Certain risk management practices are in need of improvement to ensure that management and the board are able to identify, monitor, and control all significant risks to the institution. Also, the risk management structure may need to be improved in areas of significant business activity, or staff expertise may not be commensurate with the scope and complexity of business activities. In addition, management's response to changing industry practices and regulatory guidance may need to improve.

The internal control system may be lacking in some important aspects, particularly as indicated by continued control exceptions or by a failure to adhere to written policies and procedures. The risk management weaknesses could have adverse effects on the safety and soundness of the institution if corrective action is not taken by management.

Rating 4 (Marginal). A rating of 4 represents deficient risk management practices that fail to identify, monitor, and control significant risk exposures in many material respects. Generally, such a situation reflects a lack of adequate guidance and supervision by management and the board. One or more of the four elements of sound risk management is deficient and requires immediate and concerted corrective action by the board and management.

The institution may have serious identified weaknesses, such as an inadequate separation of duties, that require substantial improvement in internal control or accounting procedures, or improved adherence to supervisory standards or requirements. The risk management deficiencies warrant a high degree of supervisory attention because, unless properly addressed, they could seriously affect the safety and soundness of the institution.

Rating 5 (Unsatisfactory). A rating of 5 indicates a critical absence of effective risk management practices with respect to the identification, monitoring, or control over significant risk exposures.

¹⁴ See SR letter 95-51, "Rating the Adequacy of Risk Management Processes and Internal Controls at State Member Banks and Bank Holding Companies," and SR letter 16-11, "Supervisory Guidance for Assessing Risk Management at Supervised Institutions with Total Consolidated Assets Less than \$50 Billion."

One or more of the four elements of sound risk management is considered wholly deficient, and management and the board have not demonstrated the capability to address these deficiencies.

Internal controls are critically weak and, as such, could seriously jeopardize the continued viability of the institution. If not already evident, there is an immediate concern as to the reliability of accounting records and regulatory reports and the potential for losses if corrective measures are not taken immediately. Deficiencies in the institution's risk management procedures and internal controls require immediate and close supervisory attention.

Risk Management Subcomponents

Board and Senior Management Oversight

Rating 1 (Strong). An assessment of Strong signifies that the board and senior management are forward-looking, fully understand the types of risk inherent in the holding company's activities, and actively participate in managing those risks. The board has approved overall business strategies and significant policies, and ensures that senior management is fully capable of managing the activities that the holding company conducts. Consistent with the standards of safety and soundness, oversight of risk management practices is strong and the organization's overall business strategy is effective.

Senior management ensures that risk management practices are rapidly adjusted in accordance with enhancements to industry practices and regulatory guidance, and exposure limits are adjusted as necessary to reflect the institution's changing risk profile. Policies, limits, and tracking reports are appropriate, understood, and regularly reviewed.

Management provides effective supervision of the day-to-day activities of all officers and employees, including the supervision of the senior officers and the heads of business lines. It hires staff that possess experience and expertise consistent with the scope and complexity of the organization's business activities. There is a sufficient depth of staff to ensure sound operations. Management ensures compliance with laws and regulations and that employees have the integrity, ethical values, and competence consistent with a prudent management philosophy and operating style.

Management responds appropriately to changes in the marketplace. It identifies all risks associated with new activities or products before they are launched, and ensures that the appropriate infrastructure and internal controls are established.

Rating 2 (Satisfactory). An assessment of Satisfactory indicates that board and senior management have an adequate understanding of the organization's risk profile and provide largely effective oversight of risk management practices. In this regard, the board has approved all major business strategies and significant policies, and ensures that senior management is capable of managing the activities that the holding company conducts. Oversight of risk management practices is satisfactory and the organization's overall business strategy is generally sound.

Senior management generally adjusts risk management practices appropriately in accordance with enhancements to industry practices and regulatory guidance, and adjusts exposure limits as necessary to reflect the institution's changing risk profile, although these practices may be lacking in some modest degree. Policies, limits, and tracking reports are generally appropriate, understood, and regularly reviewed, and the new product approval process adequately identifies the associated risks and necessary controls.

Senior management's day-to-day supervision of management and staff at all levels is generally effective. The level of staffing, and its experience, expertise, and depth, is sufficient to operate the business lines in a safe and sound manner. Minor weaknesses may exist in the staffing, infrastructure, and risk management processes for individual business lines or products, but these weaknesses have been identified by management, are correctable in the normal course of business, and are in the process of being addressed. Weaknesses noted should not have a significant effect on the safety and soundness of the institution.

Rating 3 (Fair). An assessment of Fair signifies that board and senior management oversight is lacking in some important way and, therefore, is a cause for more than normal supervisory attention. The weaknesses may involve a broad range of activities or be material to a major business line or activity. Weaknesses in one or more aspect of board and senior management oversight have precluded the institution from fully addressing one or more significant risks to the institution. The deficiencies may include a lack of knowledge with respect to the organization's risk profile, insufficient oversight of risk management practices, ineffective policies or limits, inadequate or under-utilized management reporting, an inability to respond to industry enhancements and changes in regulatory guidance, or failure to execute appropriate business strategies. Staffing may not be adequate or staff may not possess the experience and expertise needed for the scope and complexity of the organization's business activities. The day-to-day supervision of officer and staff activities, including the management of senior officers or heads of business lines, may be lacking. Certain risk management practices are in need of improvement to ensure that management and the board is able to identify, monitor, and control all significant risks to the institution. Weaknesses noted could have adverse effects on the safety and soundness of the institution if corrective action is not taken by management.

Rating 4 (Marginal). An assessment of Marginal represents deficient oversight practices that reflect a lack of adequate guidance and supervision by management and the board. A number of significant risks to the institution have not been adequately addressed, and the board and senior management function warrants a high degree of supervisory attention. Multiple board and senior management weaknesses are in need of immediate improvement. They may include a significant lack of knowledge with respect to the organization's risk profile, largely insufficient oversight of risk management practices, ineffective policies or limits, inadequate or considerably under-utilized management reporting, an inability to respond to industry enhancements and changes in regulatory guidance, or failure to execute appropriate business strategies. Staffing may not be adequate or possess the experience and expertise needed for the scope and complexity of the organization's business activities, and the day-to-day supervision of officer and staff activities, including the management of senior officers or heads of business lines, may be considerably

lacking. These conditions warrant a high degree of supervisory attention because, unless properly addressed, they could seriously affect the safety and soundness of the institution.

Rating 5 (Unsatisfactory). An assessment of Unsatisfactory indicates a critical absence of effective board and senior management oversight practices. Problems may include a severe lack of knowledge with respect to the organization's risk profile, insufficient oversight of risk management practices, wholly ineffective policies or limits, critically inadequate or under-utilized management reporting, a complete inability to respond to industry enhancements and changes in regulatory guidance, or failure to execute appropriate business strategies. Staffing may be inadequate, inexperienced, and/or inadequately supervised. The deficiencies require immediate and close supervisory attention, as management and the board have not demonstrated the capability to address them. Weaknesses could seriously jeopardize the continued viability of the institution.

Policies, Procedures and Limits

Rating 1 (Strong). An assessment of Strong indicates that the policies, procedures, and limits provide for effective identification, measurement, monitoring, and control of the risks posed by all significant activities, including lending, investing, trading, trust, and fiduciary activities. Policies, procedures, and limits are consistent with the institution's goals and objectives and its overall financial strength. The policies clearly delineate accountability and lines of authority across the institution's activities. The policies also provide for the review of new activities to ensure that the infrastructure necessary to identify, monitor, and control the associated risks is in place before the activities are initiated.

Rating 2 (Satisfactory). An assessment of Satisfactory indicates that the policies, procedures and limits cover all major business areas, are thorough and substantially up-to-date, and provide a clear delineation of accountability and lines of authority across the institution's activities. Policies, procedures, and limits are generally consistent with the institution's goals and objectives and its overall financial strength. Also, the policies provide for adequate due diligence before engaging in new activities or products. Any deficiencies or gaps that have been identified are minor in nature and in the process of being addressed. Weaknesses should not have a significant effect on the safety and soundness of the institution.

Rating 3 (Fair). An assessment of Fair signifies that deficiencies exist in policies, procedures, and limits that require more than normal supervisory attention. The deficiencies may involve a broad range of activities or be material to a major business line or activity. The deficiencies may include policies, procedures, or limits (or the lack thereof) that do not adequately identify, measure, monitor, or control the risks posed by significant activities; are not consistent with the experience of staff, the organization's strategic goals and objectives, or the financial strength of the institution; or do not clearly delineate accountability or lines of authority. Also, the policies may not provide for adequate due diligence before engaging in new activities or products. Weaknesses noted could have adverse effects on the safety and soundness of the institution unless corrective action is taken by management.

Rating 4 (Marginal). An assessment of Marginal indicates deficient policies, procedures, and limits that do not address a number of significant risks to the institution. Multiple practices are in need of immediate improvement, which may include policies, procedures, or limits (or the lack thereof) that ineffectively identify, measure, monitor, or control the risks posed by significant activities; are not commensurate with the experience of staff, the institution's strategic goals and objectives, or the financial strength of the institution; or do not delineate accountability or lines of authority. Moreover, policies may be considerably lacking with regards to providing for effective due diligence before engaging in new activities or products. These conditions warrant a high degree of supervisory attention because, unless properly addressed, they could seriously affect the safety and soundness of the institution.

Rating 5 (Unsatisfactory). An assessment of Unsatisfactory indicates a critical absence of effective policies, procedures, and limits. Policies, procedures, or limits (or the lack thereof) are largely or entirely ineffective with regard to identifying, measuring, monitoring, or controlling the risks posed by significant activities; are completely inconsistent with the experience of staff, the organization's strategic goals and objectives, or the financial strength of the institution; or do not delineate accountability or lines of authority. Also, policies may be completely lacking with regard to providing for effective due diligence before engaging in new activities or products. Critical weaknesses could seriously jeopardize the continued viability of the institution and require immediate and close supervisory attention.

Risk Monitoring and MIS

Rating 1 (Strong). An assessment of Strong indicates that risk monitoring practices and MIS reports address all material risks. The key assumptions, data sources, and procedures used in measuring and monitoring risk are appropriate, thoroughly documented, and frequently tested for reliability. Reports and other forms of communication are consistent with activities, are structured to monitor exposures and compliance with established limits, goals, or objectives, and compare actual versus expected performance when appropriate. Management and board reports are accurate and timely and contain sufficient information to identify adverse trends and to thoroughly evaluate the level of risk faced by the institution.

Rating 2 (Satisfactory). An assessment of Satisfactory indicates that risk monitoring practices and MIS reports cover major risks and business areas, although they may be lacking in some modest degree. In general, the reports contain valid assumptions that are periodically tested for accuracy and reliability and are adequately documented and distributed to the appropriate decision-makers. Reports and other forms of communication generally are consistent with activities; are structured to monitor exposures and compliance with established limits, goals, or objectives; and compare actual versus expected performance when appropriate. Management and board reports are generally accurate and timely, and broadly identify adverse trends and the level of risk faced by the institution. Any weaknesses or deficiencies that have been identified are in the process of being addressed.

Rating 3 (Fair). An assessment of Fair signifies that weaknesses exist in the institution's risk monitoring practices or MIS reports that require more than normal supervisory attention. The

weaknesses may involve a broad range of activities or be material to a major business line or activity. They may contribute to ineffective risk identification or monitoring through inappropriate assumptions, incorrect data, poor documentation, or the lack of timely testing. In addition, MIS reports may not be distributed to the appropriate decision-makers, adequately monitor significant risks, or properly identify adverse trends and the level of risk faced by the institution. Weaknesses noted could have adverse effects on the safety and soundness of the institution if corrective action is not taken by management.

Rating 4 (Marginal). An assessment of Marginal represents deficient risk monitoring practices or MIS reports that, unless properly addressed, could seriously affect the safety and soundness of the institution. A number of significant risks to the institution are not adequately monitored or reported. Ineffective risk identification may result from notably inappropriate assumptions, incorrect data, poor documentation, or the lack of timely testing. In addition, MIS reports may not be distributed to the appropriate decision-makers, may inadequately monitor significant risks, or fail to identify adverse trends and the level of risk faced by the institution. The risk monitoring and MIS deficiencies warrant a high degree of supervisory attention because, unless properly addressed, they could seriously affect the safety and soundness of the institution.

Rating 5 (Unsatisfactory). An assessment of Unsatisfactory indicates a critical absence of risk monitoring and MIS. They are wholly deficient due to inappropriate assumptions, incorrect data, poor documentation, or the lack of timely testing. Moreover, MIS reports may not be distributed to the appropriate decision-makers, fail to monitor significant risks, or fail to identify adverse trends and the level of risk faced by the institution. These critical weaknesses require immediate and close supervisory attention, as they could seriously jeopardize the continued viability of the institution.

Internal Controls

Rating 1 (Strong). An assessment of Strong indicates that the system of internal controls is robust for the type and level of risks posed by the nature and scope of the organization's activities. The organizational structure establishes clear lines of authority and responsibility for monitoring adherence to policies, procedures, and limits, and wherever applicable, exceptions are noted and promptly investigated. Reporting lines provide clear independence of the control areas from the business lines and separation of duties throughout the organization. Robust procedures exist for ensuring compliance with applicable laws and regulations, including consumer laws and regulations. Financial, operational, and regulatory reports are reliable, accurate, and timely. Internal audit or other control review practices provide for independence and objectivity. Internal controls and information systems are thoroughly tested and reviewed; the coverage, procedures, findings, and responses to audits and review tests are well documented; identified material weaknesses are given thorough and timely high level attention; and management's actions to address material weaknesses are objectively reviewed and verified. The board or its audit committee regularly reviews the effectiveness of internal audits and other control review activities.

Rating 2 (Satisfactory). An assessment of Satisfactory indicates that the system of internal controls adequately covers major risks and business areas, with some modest weaknesses. In general, the control functions are independent from the business lines, and there is appropriate separation of duties. The control system supports accuracy in record-keeping practices and reporting systems, is adequately documented, and verifies compliance with laws and regulations, including consumer laws and regulations. Internal controls and information systems are adequately tested and reviewed, and the coverage, procedures, findings, and responses to audits and review tests are documented. Identified material weaknesses are given appropriate attention and management's actions to address material weaknesses are objectively reviewed and verified. The board or its audit committee reviews the effectiveness of internal audits and other control review activities. Any weaknesses or deficiencies that have been identified are modest in nature and in the process of being addressed.

Rating 3 (Fair). An assessment of Fair signifies that weaknesses exist in the system of internal controls that require more than normal supervisory attention. The weaknesses may involve a broad range of activities or be material to a major business line or activity. The weaknesses may include insufficient oversight of internal controls and audit by the board or its audit committee; unclear or conflicting lines of authority and responsibility; a lack of independence between control areas and business activities; or ineffective separation of duties. The internal control system may produce inadequate or untimely risk coverage and verification, including monitoring compliance with both safety and soundness and consumer laws and regulations; inaccurate records or financial, operational, or regulatory reporting; a lack of documentation for work performed; or a lack of timeliness in management review and correction of identified weaknesses. Weaknesses noted could have adverse effects on the safety and soundness of the institution if corrective action is not taken by management.

Rating 4 (Marginal). An assessment of Marginal represents a deficient internal control system that does not adequately address a number of significant risks to the institution. The deficiencies may include neglect of internal controls and audit by the board or its audit committee; conflicting lines of authority and responsibility; a lack of independence between control areas and business activities; or no separation of duties in critical areas. The internal control system may produce inadequate, untimely, or nonexistent risk coverage and verification in certain areas, including monitoring compliance with both safety and soundness and consumer laws and regulations; inaccurate records or financial, operational, or regulatory reporting; a lack of documentation for work performed; or infrequent management review and correction of identified weaknesses. The internal control deficiencies warrant a high degree of supervisory attention because, unless properly addressed, they could seriously affect the safety and soundness of the institution.

Rating 5 (Unsatisfactory). An assessment of Unsatisfactory indicates a critical absence of an internal control system. There may be no oversight by the board or its audit committee; conflicting lines of authority and responsibility; no distinction between control areas and business activities; or no separation of duties. The internal control system may produce totally inadequate or untimely risk coverage and verification, including monitoring compliance with both safety and soundness and consumer laws and regulations; completely inaccurate records or

regulatory reporting; a severe lack of documentation for work performed; or no management review and correction of identified weaknesses. Such deficiencies require immediate and close supervisory attention, as they could seriously jeopardize the continued viability of the institution.

Financial Condition Component

Rating 1 (Strong). A rating of 1 indicates that the consolidated holding company is financially sound in almost every respect; any negative findings are basically of a minor nature and can be handled in a routine manner. The capital adequacy, asset quality, earnings, and liquidity of the consolidated holding company are more than adequate to protect the company from reasonably foreseeable external economic and financial disturbances. The company generates more than sufficient cash flow to service its debt and fixed obligations with no harm to subsidiaries of the organization.

Rating 2 (Satisfactory). A rating of 2 indicates that the consolidated holding company is fundamentally financially sound, but may have modest weaknesses correctable in the normal course of business. The capital adequacy, asset quality, earnings and liquidity of the consolidated holding company are adequate to protect the company from external economic and financial disturbances. The company also generates sufficient cash flow to service its obligations; however, areas of weakness could develop into areas of greater concern. To the extent minor adjustments are handled in the normal course of business, the supervisory response is limited.

Rating 3 (Fair). A rating of 3 indicates that the consolidated holding company exhibits a combination of weaknesses ranging from fair to moderately severe. The company has less than adequate financial strength stemming from one or more of the following: modest capital deficiencies, substandard asset quality, weak earnings, or liquidity problems. As a result, the holding company and its subsidiaries are less resistant to adverse business conditions. The financial condition of the holding company will likely deteriorate if concerted action is not taken to correct areas of weakness. The company's cash flow is sufficient to meet immediate obligations, but may not remain adequate if action is not taken to correct weaknesses. Consequently, the holding company is vulnerable and requires more than normal supervision. Overall financial strength and capacity are still such as to pose only a remote threat to the viability of the company.

Rating 4 (Marginal). A rating of 4 indicates that the consolidated holding company has either inadequate capital, an immoderate volume of problem assets, very weak earnings, serious liquidity issues, or a combination of factors that are less than satisfactory. An additional weakness may be that the holding company's cash flow needs are met only by upstreaming imprudent dividends and/or fees from subsidiaries. Unless prompt action is taken to correct these conditions, they could impair future viability. Holding companies in this category require close supervisory attention and increased financial surveillance.

Rating 5 (Unsatisfactory). A rating of 5 indicates that the volume and character of financial weaknesses of the holding company are so critical as to require urgent aid from shareholders or other sources to prevent insolvency. The imminent inability of such a company to service its

fixed obligations and/or prevent capital depletion due to severe operating losses places its viability in serious doubt. Such companies require immediate corrective action and constant supervisory attention.

The Financial Condition Subcomponents

The financial condition subcomponents can be evaluated along business lines, product lines, or legal entity lines--depending on which type of review is most appropriate for the holding company structure.

Capital Adequacy

Rating 1 (Strong). A rating of 1 indicates that the consolidated holding company maintains more than adequate capital to support the volume and risk characteristics of all parent and subsidiary business lines and products; provide a sufficient cushion to absorb unanticipated losses arising from the parent and subsidiary activities; and support the level and composition of parent and subsidiary borrowing. In addition, a company assigned a rating of 1 has more than sufficient capital to provide a base for the growth of risk assets and the entry into capital markets as the need arises for the parent company and subsidiaries.

Rating 2 (Satisfactory). A rating of 2 indicates that the consolidated holding company maintains adequate capital to support the volume and risk characteristics of all parent and subsidiary business lines and products; provide a sufficient cushion to absorb unanticipated losses arising from the parent and subsidiary activities; and support the level and composition of parent and subsidiary borrowing. In addition, a company assigned a rating of 2 has sufficient capital to provide a base for the growth of risk assets and the entry into capital markets as the need arises for the parent company and subsidiaries.

Rating 3 (Fair). A rating of 3 indicates that the consolidated holding company may not maintain sufficient capital to ensure support for the volume and risk characteristics of all parent and subsidiary business lines and products; the unanticipated losses arising from the parent and subsidiary activities; or the level and composition of parent and subsidiary borrowing. In addition, a company assigned a rating of 3 may not maintain a sufficient capital position to provide a base for the growth of risk assets and the entry into capital markets as the need arises for the parent company and subsidiaries. The capital position of the consolidated holding company could quickly become inadequate in the event of asset deterioration or other negative factors and therefore requires more than normal supervisory attention.

Rating 4 (Marginal). A rating of 4 indicates that the capital level of the consolidated holding company is significantly below the amount needed to ensure support for the volume and risk characteristics of all parent and subsidiary business lines and products; the unanticipated losses arising from the parent and subsidiary activities; and the level and composition of parent and subsidiary borrowing. In addition, a company assigned a rating of 4 does not maintain a sufficient capital position to provide a base for the growth of risk assets and the entry into capital markets as the need arises for the parent company and subsidiaries. If left unchecked, the consolidated capital position of the company might evolve into weaknesses or conditions that

could threaten the viability of the institution. The capital position of the consolidated holding company requires immediate supervisory attention.

Rating 5 (Unsatisfactory). A rating of 5 indicates that the level of capital of the consolidated holding company is critically deficient and in need of immediate corrective action. The consolidated capital position threatens the viability of the institution and requires constant supervisory attention.

Asset Quality

Rating 1 (Strong). A rating of 1 indicates that the holding company maintains strong asset quality across all parts of the organization, with a very low level of criticized and nonperforming assets. Credit risk across the organization is commensurate with management's abilities and modest in relation to credit risk management practices.

Rating 2 (Satisfactory). A rating of 2 indicates that the holding company maintains satisfactory asset quality across all parts of the organization, with a manageable level of criticized and nonperforming assets. Any identified weaknesses in asset quality are correctable in the normal course of business. Credit risk across the organization is commensurate with management's abilities and generally modest in relation to credit risk management practices.

Rating 3 (Fair). A rating of 3 indicates that the asset quality across all or a material part of the consolidated holding company is less than satisfactory. The holding company may be facing a decrease in the overall quality of assets currently maintained on and off balance sheet. The holding company may also be experiencing an increase in credit risk exposure that has not been met with an appropriate improvement in risk management practices. Holding companies assigned a rating of 3 require more than normal supervisory attention.

Rating 4 (Marginal). A rating of 4 indicates that the holding company's asset quality is deficient. The level of problem assets and/or unmitigated credit risk subjects the holding company to potential losses that, if left unchecked, may threaten its viability. Holding companies assigned a rating of 4 require immediate supervisory attention.

Rating 5 (Unsatisfactory). A rating of 5 indicates that the holding company's asset quality is critically deficient and presents an imminent threat to the institution's viability. Holding companies assigned a rating of 5 require immediate remedial action and constant supervisory attention.

Earnings

Rating 1 (Strong). A rating of 1 indicates that the quantity and quality of the holding company's consolidated earnings over time are more than sufficient to make full provision for the absorption of losses and/or accretion of capital when due consideration is given to asset quality and holding company growth. Generally, holding companies with a 1 rating have earnings well above peer-group averages.

Rating 2 (Satisfactory). A rating of 2 indicates that the quantity and quality of the holding company's consolidated earnings over time are generally adequate to make provision for the

absorption of losses and/or accretion of capital when due consideration is given to asset quality and holding company growth. Generally, holding companies with a 2 rating have earnings that are in line with or slightly above peer-group averages.

Rating 3 (Fair). A rating of 3 indicates that the holding company's consolidated earnings are not fully adequate to make provisions for the absorption of losses and the accretion of capital in relation to company growth. The consolidated earnings of companies rated 3 may be further clouded by static or inconsistent earnings trends, chronically insufficient earnings, or less than satisfactory asset quality. Holding companies with a 3 rating generally have earnings below peer-group averages. Such holding companies require more than normal supervisory attention.

Rating 4 (Marginal). A rating of 4 indicates that the holding company's consolidated earnings, while generally positive, are clearly not sufficient to make full provision for losses and the necessary accretion of capital. Holding companies with earnings rated 4 may be characterized by erratic fluctuations in net income, poor earnings (and the likelihood of the development of a further downward trend), intermittent losses, chronically depressed earnings, or a substantial drop from the previous year. The earnings of such companies are generally substantially below peer-group averages. Such holding companies require immediate supervisory attention.

Rating 5 (Unsatisfactory). A rating of 5 indicates that the holding company is experiencing losses or a level of earnings that is worse than that described for the 4 rating. Such losses, if not reversed, represent a distinct threat to the holding company's solvency through erosion of capital. Such holding companies require immediate and constant supervisory attention.

Liquidity

Rating 1 (Strong). A rating of 1 indicates that the holding company maintains strong liquidity levels and well developed funds management practices. The parent company and subsidiaries have reliable access to sufficient sources of funds on favorable terms to meet present and anticipated liquidity needs.

Rating 2 (Satisfactory). A rating of 2 indicates that the holding company maintains satisfactory liquidity levels and funds management practices. The parent company and subsidiaries have access to sufficient sources of funds on acceptable terms to meet present and anticipated liquidity needs. Modest weaknesses in funds management practices may be evident, but those weaknesses are correctable in the normal course of business.

Rating 3 (Fair). A rating of 3 indicates that the holding company's liquidity levels or funds management practices are in need of improvement. Holding companies rated 3 may lack ready access to funds on reasonable terms or may evidence significant weaknesses in funds management practices at the parent company or subsidiary levels. However, these deficiencies are considered correctable in the normal course of business. Such holding companies require more than normal supervisory attention.

Rating 4 (Marginal). A rating of 4 indicates that the holding company's liquidity levels or funds management practices are deficient. Institutions rated 4 may not have or be able to obtain a

sufficient volume of funds on reasonable terms to meet liquidity needs at the parent company or subsidiary levels and require immediate supervisory attention.

Rating 5 (Unsatisfactory). A rating of 5 indicates that the holding company's liquidity levels or funds management practices are critically deficient and may threaten the continued viability of the institution. Institutions rated 5 require constant supervisory attention and immediate external financial assistance to meet maturing obligations or other liquidity needs.

Impact Component

The I component rating reflects the aggregate potential impact of the nondepository entities on the subsidiary depository institution(s). It is rated on a five point numerical scale. Ratings will be assigned in ascending order of supervisory concern as follows:

- 1 – low likelihood of significant negative impact;
- 2 – limited likelihood of significant negative impact;
- 3 – moderate likelihood of significant negative impact;
- 4 – considerable likelihood of significant negative impact; and
- 5 – high likelihood of significant negative impact.

Rating 1 (Low Likelihood of Significant Negative Impact). A rating of 1 indicates that the nondepository entities of the holding company are highly unlikely to have a significant negative impact on the subsidiary depository institution(s) due to the sound financial condition of the nondepository entities, the strong risk management practices within the nondepository entities, or the corporate structure of the holding company. The holding company maintains an appropriate capital allocation across the organization commensurate with associated risks. Intra-group exposures, including servicing agreements, are very unlikely to undermine the financial condition of the subsidiary depository institution(s). Parent company cash flow is sufficient and not dependent on excessive dividend payments from subsidiaries. The potential risks posed to the subsidiary depository institution(s) by strategic plans, the control environment, risk concentrations, or legal or reputational issues within or facing the nondepository entities are minor in nature and can be addressed in the normal course of business.

Rating 2 (Limited Likelihood of Significant Negative Impact). A rating of 2 indicates a limited likelihood that the nondepository entities of the holding company will have a significant negative impact on the subsidiary depository institution(s) due to the adequate financial condition of the nondepository entities, the satisfactory risk management practices within the parent nondepository entities, or the corporate structure of the holding company. The holding company maintains adequate capital allocation across the organization commensurate with associated risks. Intra-group exposures, including servicing agreements, are unlikely to undermine the financial condition of the subsidiary depository institution(s). Parent company cash flow is satisfactory and generally does not require excessive dividend payments from subsidiaries. The potential risks posed to the subsidiary depository institution(s) by strategic plans, the control

environment, risk concentrations, or legal or reputational issues within the nondepository entities are modest and can be addressed in the normal course of business.

Rating 3 (Moderate Likelihood of Significant Negative Impact). A rating of 3 indicates a moderate likelihood that the aggregate impact of the nondepository entities of the holding company on the subsidiary depository institution(s) will have a significant negative impact on the subsidiary depository institution(s) due to weaknesses in the financial condition and/or risk management practices of the nondepository entities. The holding company may have only marginally sufficient allocation of capital across the organization to support risks. Intra-group exposures, including servicing agreements, may have the potential to undermine the financial condition of the subsidiary depository institution(s). Parent company cash flow may at times require excessive dividend payments from subsidiaries. Strategic growth plans, weaknesses in the control environment, risk concentrations or legal or reputational issues within the nondepository entities may pose significant risks to the subsidiary depository institution(s). A holding company assigned a 3 impact rating requires more than normal supervisory attention, as there could be adverse effects on the safety and soundness of the subsidiary depository institution(s) if corrective action is not taken by management.

Rating 4 (Considerable Likelihood of Significant Negative Impact). A rating of 4 indicates that there is a considerable likelihood that the nondepository entities of the holding company will have a significant negative impact on the subsidiary depository institution(s) due to weaknesses in the financial condition and/or risk management practices of the nondepository entities. A 4-rated holding company may have insufficient capital within the nondepository entities to support their risks and activities. Intra-group exposures, including servicing agreements, may also have the immediate potential to undermine the financial condition of the subsidiary depository institution(s). Parent company cash flow may be dependent on excessive dividend payments from subsidiaries. Strategic growth plans, weaknesses in the control environment, risk concentrations or legal or reputational issues within the nondepository entities may pose considerable risks to the subsidiary depository institution(s). A holding company assigned a 4 impact rating requires immediate remedial action and close supervisory attention because the nondepository entities could seriously affect the safety and soundness of the subsidiary depository institution(s).

Rating 5 (High Likelihood of Significant Negative Impact). A rating of 5 indicates a high likelihood that the aggregate impact of the nondepository entities of the holding company on the subsidiary depository institution(s) is or will become significantly negative due to substantial weaknesses in the financial condition and/or risk management practices of the nondepository entities. Strategic growth plans, a deficient control environment, risk concentrations or legal or reputational issues within the nondepository entities may pose critical risks to the subsidiary depository institution(s). The parent company also may be unable to meet its obligations without excessive support from the subsidiary depository institution(s). The holding company requires immediate and close supervisory attention, as the nondepository entities seriously jeopardize the continued viability of the subsidiary depository institution(s).

(D) (Depository Institutions) Component

The (D) component identifies the overall condition of the subsidiary depository institution(s) of the holding company. For holding companies with only one subsidiary depository institution, the (D) component rating generally will mirror the CAMELS composite rating for that depository institution. To arrive at a (D) component rating for holding companies with multiple subsidiary depository institutions, the CAMELS composite ratings for each of the depository institutions should be weighted, giving consideration to asset size and the relative importance of each depository institution within the overall structure of the organization. In general, it is expected that the resulting (D) component rating will reflect the lead depository institution's CAMELS composite rating.

If in the process of analyzing the financial condition and risk management programs of the consolidated organization, a major difference of opinion regarding the safety and soundness of the subsidiary depository institution(s) emerges between the Federal Reserve and the depository institution's primary regulator, then the (D) rating should reflect the Federal Reserve's evaluation.
